Experience

AI Engineering Intern

May 2025 – Aug 2025

Regality AI, Hyderabad

- Developed Graph-RAG inspired retrieval systems and agentic workflows using LangChain.
- Built hybrid retrieval pipelines combining semantic search and contextual reasoning.
- Applied prompt engineering and LLM evaluation techniques to improve response quality and reduce hallucinations.

Projects

Regal Forms Assistant

OpenAI, LangChain, Retrieval-Augmented Generation (RAG)

- Developed a RAG-powered assistant to streamline RBI compliance workflows.
- Implemented document-aware retrieval pipelines for context-driven guidance.
- Automated PDF generation and form preparation workflows.

CSV AI Analyst

Gemini, LangChain, Pandas

- Built an AI-powered analytics platform enabling natural language interaction with CSV datasets.
- Developed conversational analytics workflows for insight generation and exploration.
- Automated data-processing operations using Pandas to reduce manual analysis effort.

Document Intelligence Assistant

LangChain, FAISS, ChromaDB

- Built a Retrieval-Augmented Generation application for PDF question answering.
- Implemented vector-based retrieval using FAISS and ChromaDB.
- Applied grounding techniques to ensure responses were derived from uploaded documents.

Technical Skills

Programming Languages: Python, SQL, C++

Generative AI: LangChain, RAG, Prompt Engineering, OpenAI API, Gemini API, Vector Databases, FAISS, ChromaDB

Machine Learning: TensorFlow, PyTorch, Scikit-Learn, CNN, LSTM, NumPy, Pandas

Tools Platforms: Docker, Git, GitHub, Linux, Jupyter Notebook, VS Code

Education

B.Tech in Artificial Intelligence and Machine Learning

Sreyas Institute of Engineering and Technology

Expected Graduation: Apr 2026

CGPA: 7.6/10

Achievements

- NCC A Certificate Holder.
- Built multiple AI applications involving RAG, document intelligence, and conversational analytics.
- Active learner in Generative AI, LLM Evaluation, and Agentic AI workflows.
